Title of the Activity: Caroms Competitions for Girls Students

Date of Conduction: 11/08/2018

Number of Students Involved: 6

Objectives:

The basic objective of carrom is to use the striker with a flick of the finger to drive the carrom into any of the four corner pockets. The game is about pocketing the carrom and the queen before the opponent, and scoring maximum points to win. Know more about this game and its laws by reading further.

Description:

Sharpens the Mind. The online board game also helps to keep the person sharp as one has to see the outcome of various shots taken during the game. While playing the game a person is likely to get directed due to the number of options available in front of them. There are various shots one can take while playing carrom.

Not many know that carrom is believed to have been invented in India. Some even believe it originated in Sri Lanka. Although there is no evidence of its origin, the game's roots lie in Asia or India. In fact, it is even believed that the Indian Maharajas invented the game for their entertainment.

Carrom is not just a game of chance but one that requires skill and strategy. It requires a keen eye for angles and an understanding of geometry and physics. The player must calculate the best possible move considering the position of the discs on the board. While considerable skill is possible with Crokinole, the game does not particularly reward skill. Carrom is a more challenging, difficult and strategic game.

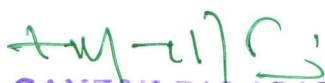

The Physical Education Department of Government Degree College, Chebrole has conducted a Carroms Competitions on the occasion of Independence Day Celebrations at our college campus. The Incharge principal Dr.P.Venkateswarlu speech; he highlighted the importance of the Carroms Competitions for Girls Students.

The Carroms Competitions of the female students was concluded with heartfelt vote of thanks given by the Incharge of Physical Education Department, Sri.P.Ganesh and the whole programme was coordinated by him. All teaching & Non-teaching staff and students are participated in this programme and made it grand success.

Outcomes:

- 1) Students are motivated by the speeches of principal and lecturers about the importance of Carroms Competitions.
- 2) The winner of the game is the player with maximum score. Conclusion: A great deal of hand-eye coordination is needed in order to play a game of carrom. It also requires practice and determination.
